

Standard report

① Since their introduction in December 2023, 10 of the 25 gray wolves have died or been killed. In addition, communities, particularly those near ranching operations, have been riveted and friends have been divided over the problems associated with wolf reintroduction. Given these facts, do you feel that Colorado's reintroduction of gray wolves, under voter-approved Proposition 114, has been

● 5 While we know a small percentage of the wolves will wander (as do five percent of wolves from Yellowstone each year and are subsequently killed by trappers and hunters), would you support the creation of a protected State Wildlife Corridor in Colorado (a mini-Yellowstone) of 1 M acres (40 x 40 miles), a corridor rich in prey for wolves (elk, deer, rodents, small game), that would serve as an ideal home base for the reintroduction of future wolves to Colorado?

Yes	68.0% 348
No	16.2% 83
Unsure or no opinion	15.8% 81

⑥ Given that gray wolves may wander and already now exist in habitats apart from the proposed State Wildlife Corridor, would you support the purchase of the grazing lease or purchase of the livestock by the State of Colorado (or another associated organization) in order to reduce or eliminate depredation incidents on these ranching operations?
